**Conclusions**

The values resulted meet the specifications demanded for EXTRA VIRGIN OLIVE OILS by International Olive Oil Council Trade Standard IOC/T.15/NC No 3/Rev. 11 July 2016.

**References for limits**

<sup>(1)</sup> IOC/T.15/NC No 3/Rev. 11 (July 2016)

### Sample description

Label: Aceite de Oliva Extra Virgen "A - Favolosa, Monovarietal", producto Chileno - TNT Ref. GD974809497WW

Seal: Hermetically sealed dark glass bottle

Sampling procedure: By the Customer

Quantity of sample: 250 ml

Return of sample: No

### Notes

ND: Not Detectable as lower than the LOD of the test method.

U: Expanded uncertainty expressed with the same unit of measurement of the result obtained, calculated using a K factor = 2 for assuring a confidence level around 95% or, for microbiological tests, confidence interval with level of probability around 95%. For microbiological test the result is reported as "estimated" number of micro-organism per milliliter or gram if it is based on count less than 10, but at least 4.

LOD: Limit of Detection, the lowest concentration of analyte that can be detected, but not necessarily quantitated under the stated test conditions.

LOQ: Limit of Quantification, the lowest concentration of an analyte that can be determined with acceptable precision and accuracy under the stated conditions of the test.

R% : Mean Recovery in percentage (this value is not used to amend pesticides and metals analytical results).

En: Revision "N" of the Test Report that identifies the Amendment. This document replaces any previous version of the Test Report.

\*: TEST NOT ACCREDITED BY ACCREDIA

### Methods:

02B2-C = ISO 3960:2007

03B-C = AOCS Ch 8-02:2009

04/1-C = COI/T.20/Doc. n. 10 2001

05/1-C = COI/T.20/Doc. n. 30 2011

07B-C = AOCS Ce 2-66:2009 + AOCS Ce 1f-96:2009

09/1-C = COI/T.20 Doc. n. 20 2010

1020 = COI/T.20/Doc. n. 29 2010

10B-C = AOCS Ch 5-91:2009

14B-C = ISO 15788-1:1999

21-C = ISO 660:2009
